Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase “previously determined tool accessories and trays” lacks antecedent basis.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Katson et al. in view of Bailey and Batten. Katson shows the claimed ladder with the exception of the tapered sections, cross brace members, and the affixed locking pins. Bailey shows a ladder having tapered sections and cross brace members 20,21. Batten shows an affixed locking pin at 11. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Katson to comprise tapered sections and cross brace members, as taught by Bailey, to enhance stability of his ladder and to reinforce his rungs, respectively, and to comprise affixed locking pins, in lieu of his, for locking his sections in selective

positions, Furthermore, to provide Katson with conventional friction reducing means to facilitate relative sliding of his sections, to construct his rungs to be welded or riveted, as is well known in the art, and to make the ladder of the claimed height and width depending on the reach and stability desired, would have been an obvious mechanical expedient.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Katson, Bailey and Batten, as applied to claim 1 above, and further in view of Cornejo et al. Cornejo shows text, graphics and indicia. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the ladder of Katson with text, graphics and indicia, as taught by Cornejo, as an indicating means.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Katson, Bailey and Batten, as applied to claim 1 above, and further in view of Irish. Irish shows a tray for tool accessories. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the ladder of Katson with a tray for tool accessories, as taught by Irish, for a user convenience.

The continuation data is incorrect. It appears that the parent case is SN. 10/055665 which was abandoned 4.17.03 before the filing of the present application.
